

Financial Tear Sheet

We are a global renewable energy company that transforms how cleantech renewable energy is generated, distributed, used and owned.

TerraForm Power creates value for its investors by owning and operating best-in-class solar power portfolios around the globe. We believe we have a responsibility to transform the future with energy in a way that is sustainable and environmentally friendly. With demand for energy growing, together with increasingly scarce natural resources, developing home grown renewable resources like solar is vital.

The demand for renewable power is growing rapidly. We are achieving grid-parity, the point where renewable energy can produce electricity at a cost equal to or lower than more traditional power generation methods. Our first-class portfolio of assets, acquired from a range of the most reliable and highest quality energy providers, delivers secure returns from reliable and proven assets.

While we own and operate some of the world’s most technologically advanced solar installations, as a responsible investor, we intend to acquire other clean power generation assets including wind, geothermal, hydroelectric and hybrid energy solutions enabling us to provide power around the clock.

We believe we are ideally positioned to capitalize on the growth in renewable power generation.
