

Health, Safety, Security & Environmental Policy

Terraform Power, LLC is committed to conducting business in a manner that demonstrates respect and care for people and the natural environment. Health, Safety, Security and Environmental (HSSE) performance is an integral part of our business and contributes to our goal of promoting the welfare of our employees, contractors, and communities. All employees are responsible and accountable to HSSE performance.

Health and Safety

TerraForm Power's overall safety objective is to incur zero high-risk incidents and zero lost time injuries. We will achieve this by:

- Ensuring active participation of Company leadership in health and safety.
- Striving for the elimination and control of high-risk hazards for people affected by our operations.
- Requiring all workers to contribute to the safety process.
- Complying with safety laws and regulations.
- Planning for emergency situations.

TerraForm Power, LLC

Security

TerraForm Power strives for continuous risk management for the security of our personnel, operational assets, and the public. We will achieve this by:

- Performing proactive assessments to reduce security risk.
- Continually reducing exposure in all areas of personal, physical, and organizational and cyber security.
- Promoting of a collaborative approach across the organization to maintain a robust security management system.
- Focusing on the fundamental elements of preparedness, prevention, detection, response, and recovery.

Environment

TerraForm Power's goal is to protect and enhance the ecosystems and communities affected by our activities while managing a successful business. We will achieve this by:

- Planning for, and managing the environmental risks associated with our operations with an overall goal of continual improvement.
- Ensuring the efficient, sustainable, and responsible use of the natural resources entrusted to us.
- Generating clean, renewable energy through our operations.
- Promote open communication throughout the organization, the community and with applicable regulatory agencies on environmental matters.
